Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1.   (Currently Amended) A group-editable web page editing system comprising:

an element selection device that selects ~~at least one~~ a portion of an electronic document;

an editing device that determines an edit user interface and allows editing of the ~~at least one~~ selected portion through the edit user interface; and

an updating device that replaces the ~~at least one~~ selected portion with the ~~at least one~~ edited portion.

2.   (Original) The system of claim 1, wherein the updating device accounts for one or more edits by other users.

3.   (Original) The system of claim 2, wherein the one or more edits by other users are stored in a queue.

4.   (Original) The system of claim 1, further comprising a document locking device that at least one of locks and unlocks the electronic document.

5.   (Currently Amended) The system of claim 1, wherein the updating device updates the ~~at least one~~ selected portion dependent on the at ~~least one~~ edited portion.

6.   (Currently Amended) The system of claim 1, wherein the element selection device replaces at least one ~~of the~~ non-selected ~~portions~~ portion with a placeholder and wherein the edit user interface suppresses one or more non-selected portions of the electronic document.

7.   (Original) The system of claim 1, wherein the editing device displays a placeholder corresponding to at least one non-selected portion in the edit user interface.

8.   (Original) The system of claim 1, wherein the element selection device permits selection of all portions of the electronic document that are associated with a given portion class.

9. (Original) The system of claim 8, wherein the portion classes include the class of items, the class of templates, and the class of remaining code.

10. (Original) The system of claim 8, wherein a user may select and edit portions of the template class, while one or more other users may simultaneously edit portions of the item class.

11. (Original) The system of claim 8, wherein one user may select and edit portions of the remaining code class, while one or more other users may simultaneously edit portions of the item class.

12. (Currently Amended) A method for editing a group-editable web page comprising:

selecting ~~one or more portions~~ a portion of an electronic document;

determining an edit user interface for the ~~one or more~~ selected ~~portions~~ portion;

editing the ~~one or more~~ selected ~~portions~~ portion using the edit user interface; and

replacing the ~~one or more~~ selected ~~portions~~ portion based on ~~one or more~~ the edited ~~portions~~ portion.

13. (Original) The method of claim 12, wherein the replacing accounts for one or more edits by other users.

14. (Original) The method of claim 12, further comprising locking the electronic document.

15. (Currently Amended) The method of claim 12, wherein the edit user interface displays a placeholder corresponding to at least one non-selected portion and the ~~one or more~~ selected p ~~portions~~ portion and wherein the edit user interface suppresses the at least one non-selected portion of the electronic document.

16. (Currently Amended) The method of claim 12, further comprising updating ~~the one or more portions dependent on the one or more edited portions~~ another portion of the electronic document.

17. (Original) The method of claim 12, further comprising:

unlocking the electronic document; and

processing any user contributions stored in a queue.

18. (Currently Amended) The method of claim 12, further comprising replacing one or more ~~of the~~ non-selected portions with a placeholder.

19. (Original) The method of claim 12, wherein the electronic document comprises items, templates and remaining code.

20. (Currently Amended) An information storage media comprising:

information that selects ~~one or more portions~~ a portion of an electronic document;

information that determines an edit user interface for the ~~one or more~~ selected ~~portions~~ portion;

information that edits the ~~one or more~~ selected ~~portions~~ portion; and

information that replaces the ~~one or more~~ selected ~~portions~~ portion based on ~~one or more~~ the edited ~~portions~~ portion.

21. (Original) The information storage media of claim 20, wherein the replacing accounts for one or more edits by other users.

22. (Original) The information storage media of claim 20, further comprising information that locks the electronic document.

23. (Currently Amended) The information storage media of claim 20, wherein the edit user interface displays a placeholder corresponding to at least one non-selected portion and the ~~one or more~~ selected ~~portions~~ portion and wherein the edit user interface suppresses the at least one non-selected portion of the electronic document.

24. (Currently Amended) The information storage media of claim 20, further comprising information that updates ~~the one or more portions dependent on the one or more edited portions~~ another portion of the electronic document.

25.   (Original) The information storage media of claim 20, further comprising:

> information that unlocks the electronic document; and
>
> information that processes any user contributions stored in a queue.

26.   (Currently Amended) The information storage media of claim 20, further comprising information that replaces one or more of the non-selected portions with a placeholder.

27.   (Original) The information storage media of claim 20, wherein the electronic document comprises items, templates and remaining code.

28.   (New) The system of claim 1, further comprising a plurality of editing devices each with a different edit user interface, wherein one of the edit user interfaces from one of the plurality of editing devices is selected for the editing of the selected portion.

29.   (New) The system of claim 28, wherein the electronic document is a web page and the plurality of editing devices are each different web page editing devices.

30.   (New) The method of claim 12, wherein the determining an edit user interface further comprises selecting one of a plurality of different edit user interfaces, wherein the editing of the selected portion is with the selected one of the plurality of different edit user interfaces.

31.   (New) The method of claim 30, wherein the electronic document is a web page and the plurality of different edit user interfaces are each different web page edit user interfaces.

32.   (New) The information storage media of claim 20, wherein the information that determines an edit user interface further comprises information that selects one of a plurality of different edit user interfaces, wherein the information that edits the selected portion is with the selected one of the plurality of different edit user interfaces.

33.   (New) The information storage media of claim 32, wherein the electronic document is a web page and the plurality of editing devices are each different web page editing devices.
